Optimized Prompt for Taskade App Creation

Optimized Prompt for Taskade App Creation

Document Title

Optimized Prompt for Taskade App Creation

Prepared By: Andries Liebenberg
Date: November 25, 2025
Workspace: AN3S

Table of Contents

1. **Overview**
2. **Subtasks for Implementation**
   - Privacy Screen
   - Data Reset & Knowledge Base Update
   - Functionality Update
   - Card Replacement
   - UX/UI Integrity
   - Testing & Optimization
   - User Data Capture
   - Documentation & Training
   - Data Clearance

1. Overview

This document outlines the steps required to transition the Taskade app from its current focus on security to supporting the "Intern Us" project. The app will serve as a decision-making tool for executives to select features for the new "Intern Us" website. Key priorities include maintaining privacy, updating the app's functionality, and aligning it with the South African internship and job market.

Key Objectives

- **Privacy Preservation:** The first screen of the app must remain unchanged to ensure user privacy.
- **Project Transition:** Shift the app's focus to the "Intern Us" project, emphasizing its role in feature selection for the website.
- **Knowledge Base Update:** Clear all previous data and refocus the app's knowledge base on the South African internship and job market.
- **Feature Alignment:** Retain existing functions but update them to reflect "Intern Us" features.
- **UX/UI Consistency:** Preserve the current user experience and interface layout.
- **Card Replacement:** Replace existing cards with new "Intern Us" feature cards, as detailed in the attached documents.

---

2. Subtasks for Implementation

2.1 Privacy Screen

- Ensure the first screen remains unchanged to maintain user privacy.

2.2 Data Reset & Knowledge Base Update

- **Data Clearance:** Remove all previously stored data from the app.
- **Knowledge Base Update:** Load a new knowledge base tailored to the South African internship and job market, ensuring relevance and accuracy.

2.3 Functionality Update

- **Feature Review:** Evaluate all existing app functions.
- **Feature Alignment:** Update functionalities to align with the "Intern Us" project goals, ensuring seamless integration with the new feature set.

2.4 Card Replacement

Replace the current security-related cards with new "Intern Us" feature cards as outlined below:

Step 1: AI Features

1. Add an **info card** introducing the first set of cards based on the document "AI Features Info Card."
2. Add 25 cards using the information provided in the document "AI Features."

Step 2: Non-AI Features

1. Add an **info card** introducing the second set of cards based on the document "Non-AI Features Info Card."

2. Add 25 cards using the information provided in the document "Non-AI Features."

Step 3: Gimmicky AI Features

1. Add an **info card** introducing the third set of cards based on the document "Gimmicky AI Features Info Card."
2. Add 25 cards using the information provided in the document "Gimmicky AI Features."

2.5 UX/UI Integrity

- Ensure that the app's user experience and interface layout remain unchanged throughout the transition process.

2.6 Testing & Optimization

- **Functionality Testing:** Test the updated app to confirm that all features work seamlessly with the new "Intern Us" functionalities.
- **Performance Optimization:** Optimize the app to handle data efficiently, avoiding long prompts or large data chunks that could hinder performance.

2.7 User Data Capture

- Implement a system to log user interactions and decisions within the app. This will provide valuable insights into user preferences and behavior.

2.8 Documentation & Training

- **Documentation Update:** Revise all relevant documentation to reflect the changes made to the app.
- **Training Materials:** Develop training resources to ensure users can effectively navigate and utilize the updated app.

2.9 Data Clearance

- Clear all previously captured data from the app to ensure a fresh start aligned with the "Intern Us" project.

---

3. Conclusion

This document provides a structured approach to transitioning the Taskade app into a decision-making tool for the "Intern Us" project. By following the outlined subtasks, the app will be optimized to meet the needs of executives while maintaining privacy, functionality, and user experience.

For further details, refer to the attached project background and supporting documents.
